15 seats only – Hurry Register Now

What is Information Security

Information security means protecting information and information systems from unauthorized access, use, disclosure, disruption, modification, perusal, inspection, recording or destruction.

Information security is defined as the preservation of what is often known as CIA:

Confidentiality

Ensuring that information is accessible only to those authorized to have access

Integrity

Safeguarding the accuracy and completeness of information and processing methods

Availability

Ensuring that authorized users have access to information and associated assets when required.

It further explains that "information security is achieved by implementing a suitable set of controls", and that these need to be "established to ensure that the specific security objectives of the organization are met".

Target Audience:

IT Heads, IT Managers, ISMS Implementers, ISMS lead, ISMS Managers, Information Security Implementers, ISMS Auditors, ISMS practitioners, Quality Managers, Quality Heads, SQA.

Course Highlights

- Faculty with multiple ISO 27001 implementation and audit experience
